#### DESCRIPTION

We present our new sound equipment EWENT EW3526 Gaming 2.1 speakers with subwoofer and Bluetooth. This wonderful equipment has Bluetooth, 3.5mm AUX line input jack, FM Radio, USB / SD multimedia reader to be able to access your favorite music from the storage you want.

The 2.1 EWENT EW3526 sound system has 25W of maximum power and has been designed to make the gamer and all those users who want to enjoy great sound quality and good bass vibrate during their gaming experience. Its design and its accessibility at all times to its controls and its variety of color light combinations guarantee an unimaginable gaming experience.

The Bluetooth connection, its sound connection via cable, access to your music stored on a pendrive, USB external hard drive or simply on an SD memory card, will allow you to practically access all your best music. Its versatile connection format will also allow it to be connected to almost any television.

If you don't have enough with the music you store, you can listen to your favorite station from its high-quality FM radio tuner.

The control knobs that it incorporates, make it easy for you to raise and lower the volume and set the best bass level you want at all times. Apart from being able to turn the device off or on from its built-in switch, you can choose if you want the gaming lights that it incorporates to come into operation through another independent switch.

The 25W of maximum power together with the great variety of combinations of lights that the equipment makes will make your gaming experience unbeatable and enjoy it to the fullest.

You only have to connect your cable with a 3.5mm jack connector to the 3.5mm headphone jack of the PC or laptop and the USB cable to the device itself where the sound cable or an external 5V USB socket is connected to get electricity.

The EWENT EW3526 2.1 stereo system has the latest Bluetooth technology that will allow you to connect it to your Bluetooth sound source and enjoy your favorite music stored on your device with Bluetooth technology.
